# Translation Software

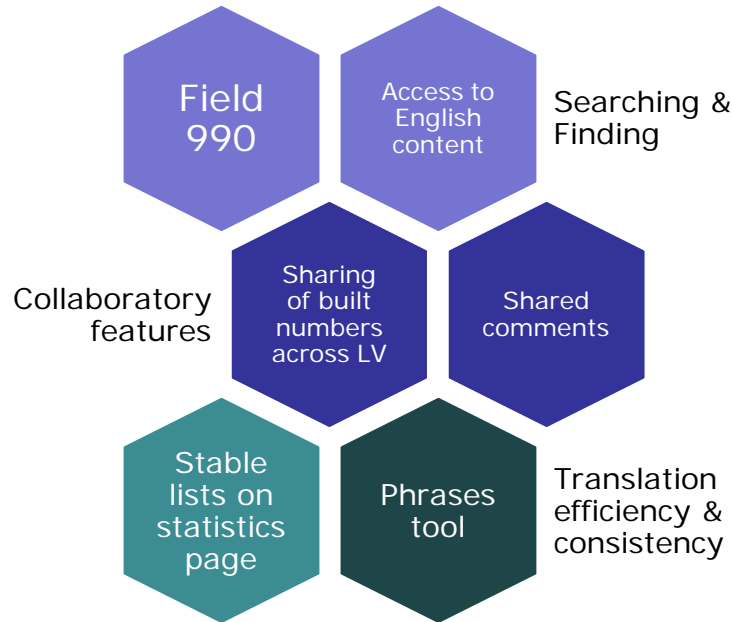

## ChatGPT

Happy 21st birthday, Dewey Translation Software! 🎉 Here's to another year of bugs squashed, code optimized, and users delighted! May your algorithms be efficient, your interfaces intuitive, and your updates always seamless. Here's a special wish just for you:

"May you continue to evolve and innovate, bringing joy and utility to users far and wide. May your codebase be clean, your servers stable, and your API always backward compatible. Here's to endless lines of code and countless lines of success! Cheers to your 21 years and to many more to come!" 🍷🍰📍

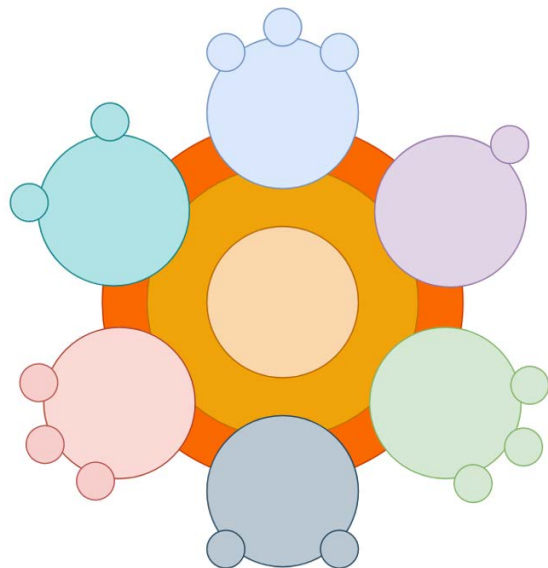

# Upcoming features: Translation Software

# Sharing of built numbers across language versions

*From now on, built numbers can also be reviewed with regard to their suitability for the international community and be shared with the other translations!*

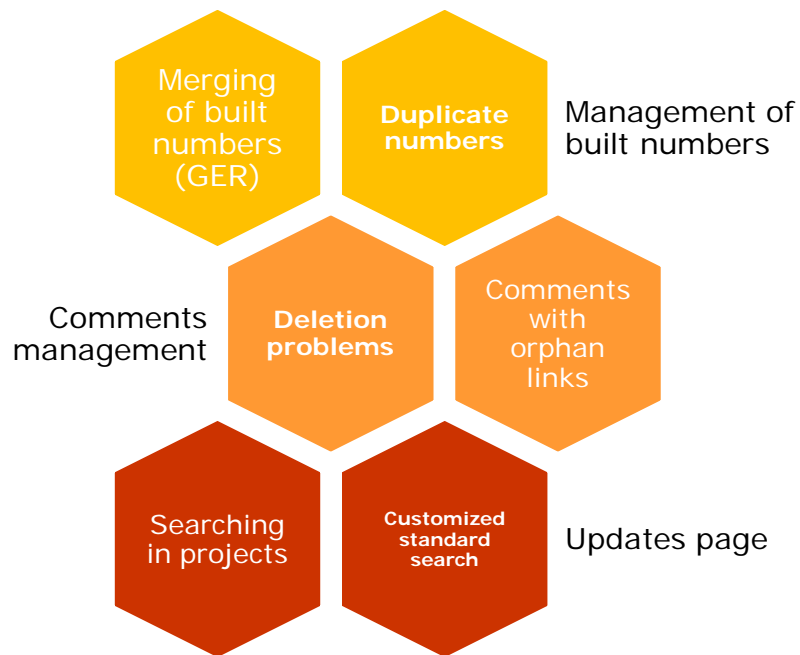

*With shared built numbers, we now have an additional option to get specific topics into the DDC faster or to share numbers for areas that have no or few built numbers.*

## Field 990 & English content

- Field 990 can now be searched for in English records
  - e.g. 990:EPC 144-S64.1, 990:Minor RI {\$d 20220125}
  - Now you can create a complete EPC-based translation project in a second!
- You can now search with the status „new“
  - e.g. status:new && home care

# Upcoming features: WebDewey

# Management of built numbers in WebDewey

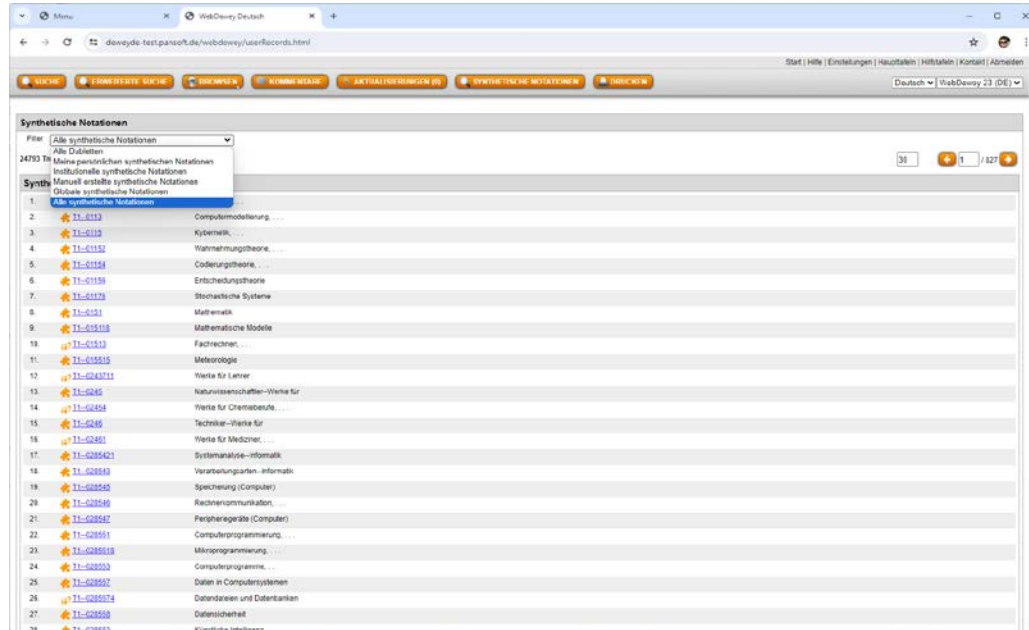

- Managing duplicate built numbers
- Managing your personal built numbers
- Merging imported built numbers with valid number components (German use case)
- and more
